**Subject:** FW: June 30 - "Bremerton Gasworks Superfund Site" Info & Stakeholders Meeting

Attn: Council Members

A postcard received at the Council Office has been scanned and attached for your convenience, which notes the EPA's "*Beach Cleanup Report is available for Bremerton Gasworks Superfund Site*".

Also note in the related e-mail string below the "*RI/FS Scoping Meeting with Stakeholders*" is now scheduled for **Monday, June 30 from 2:00 to 4:00 PM** at the **Cascade Natural Gas Office** in Bremerton; with an optional **site visit** from approximately **4:00 to 5:00 PM**.

If you are interested in attending this meeting and the site-visit, please notify me so I can provide an RSVP on your behalf, and keep track if there will be a quorum.

Thanks, Lori

All-

Thanks for your responses. It looks like the afternoon of Monday, June 30<sup>th</sup> works for almost everyone and is the date that accommodates the most people. We will have a speaker phone available and will send out a call-in number for anyone who wishes to call in rather than attend in person. The meeting will be from approximately 2 to 4 pm at Cascade Natural Gas offices in Bremerton, with an optional site visit (approximately 4-5pm) afterwards. I will also send an Outlook Meeting Invite for the meeting.

An agenda and directions to Cascade's office and the site will be sent out later this month.

Feel free to contact me or the EPA project manager, Bill Ryan (206-553-8561), if you have questions in the meantime.

Thanks,

Jeremy

**Subject:** Bremerton Gas Works - RI/FS scoping - meeting with stakeholders

All-

This email is a follow-up to an email provided earlier this month by Bill Ryan, US EPA project manager for the Bremerton Gas Works Site. On behalf of Cascade Natural Gas Corporation, Cascade's environmental consultants (Aspect Consulting and AnchorQEA) are working with EPA to set up a meeting for key stakeholders. A site status update and objectives of the proposed meeting were described by EPA in the earlier email.

The purpose of this email is to identify a date for the meeting. The meeting will be held in Bremerton at Cascade's offices. We anticipate the meeting will include a site visit for those interested, and that the meeting and site visit together will take about a half-day. Specific logistics (including meeting time and directions) will be provided after a meeting date is established.

If each of you could respond to this email (please do not hit reply all) with the following information:

- Interest in attending (e.g., highly interested; may attend if available; or unlikely to attend).
- Availability for the following potential meeting date/time blocks:

June 24 morning  
June 24 afternoon  
June 30 morning  
June 30 afternoon  
July 1 morning  
July 1 afternoon

Please call or email if you have any questions. Thanks!

Jeremy

Hi Lori-

We are about to begin scheduling of the meeting discussed below and would like to contact Councilman Runyon. Is it possible to get his email address (and his phone number) so that he can

be contacted directly as we schedule the meeting?

**Subject:** FW: Bremerton Gasworks Superfund Site

Hi Lori,

Would you please make sure this is forwarded to Council member Runyon and that a correction for contact for district 6 is made to Mr. Williams.... I would still like to remain on this list as a interested and concerned community member as it is just done the street from my house.

Please thank Mr. Williams for the update...

Thanks, Faye

**Sent:** Wednesday, May 07, 2014 2:47 PM  
**To:** Patty Lent; Faye Flemister  
**Subject:** Bremerton Gasworks Superfund Site

Greetings Mayor Lent and Councilwoman Flemister –

It has been a while since I have communicated with you about the site and activities related to it. I'm writing to

- 1) provide you with a brief update of activities at the site and
- 2) notify you of an upcoming meeting that we hope you will be able to attend.

In the last year, Cascade Natural Gas (Cascade) has conducted additional sampling of beach sediments at the site and performed a second time-critical removal action on a portion of the beach (a removal action had been previously performed on the beach in 2010). With the completion of the removal action, EPA has been working with Cascade and its contractors to develop materials that will be used in determining the scope of the remedial investigation and feasibility study that will be conducted at the site. The remedial investigation will be conducted to determine the nature and extent of contamination at the site and to determine the risks associated with the contamination to human health and the environment. The feasibility study will identify and evaluate a range of cleanup options for the site. This work will ultimately support EPA's cleanup decision for the site.

As part of our effort to determine the scope of the upcoming site investigation, we are currently planning on holding a meeting with key stakeholders, including the City of Bremerton. The primary objectives of the meeting will be to:

- 1) Provide attendees with a brief overview of the Superfund process and where current site-related activities fall within the process;
- 2) Provide attendees with background information about the site;
- 3) Present information developed to date related to the scope of the investigation; and
- 4) Possibly conduct a brief site visit.

The broader objectives of the meeting will be to provide you/your organization with sufficient information for you to begin to formulate your role/level of participation in the investigation and also to solicit your input in defining the scope of the investigation.

Currently, we are targeting the meeting for MID-TO-LATE JUNE in BREMERTON. You will be contacted in the near future by one of Cascade's contractors regarding potential dates, your interest and availability to attend, and meeting location.

I hope you will be able to join us when we meet. In the interim, please don't hesitate to contact me with any questions or comments about site-related activities you may have.
